ABBREVIATIONS AND OTHER USAGES

Standard notations are used throughout this publication with meanings as follows:

LGA	Local Government Area	n.a.	not available
SD	Statistical Division	n.p.	not available for separate publication (but included in totals where applicable)
SSD	Statistical Subdivision		
(S)	Shire	—	nil or rounded to zero
(T)	Town	----- 68 -----	Indicates that the figure is the sum of these columns
Pt	Part		
(CGC)	Community Government Council		

- Note: (i) Northern Territory totals may include values for Off-Shore Area & Migratory Statistical Division, not elsewhere shown.
- (ii) Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown.

INTRODUCTION

Regional Statistics, Northern Territory contains summary statistics for the major regions of the Territory, and for local government areas and statistical areas within these regions. Information is presented in the form of tables of data, and maps highlighting regional landmarks.

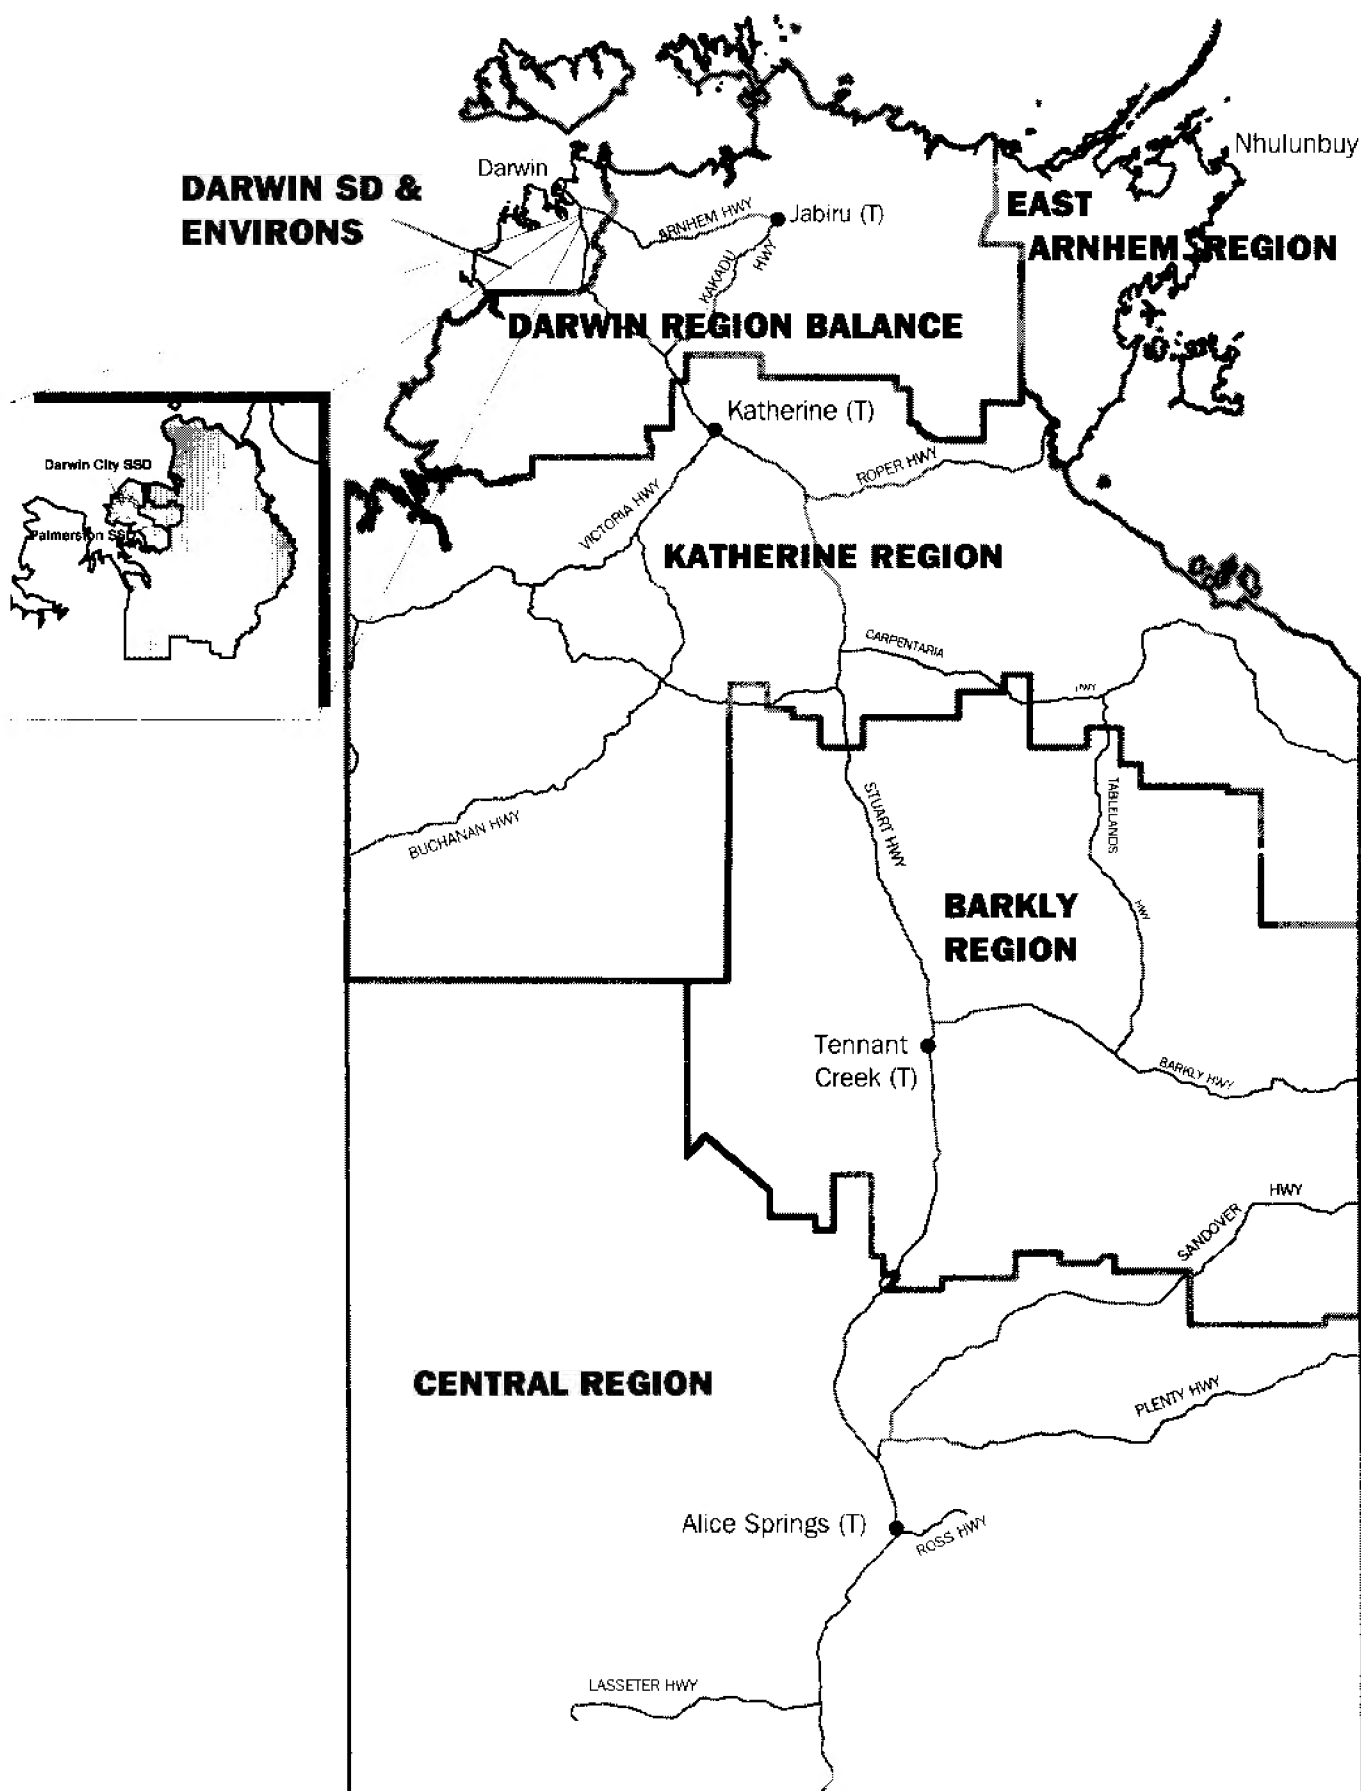

A feature of this edition of *Regional Statistics, Northern Territory* is the inclusion of socio-economic data for the neighbouring areas of Indonesia, in particular the provinces of eastern Indonesia.

Australian Bureau of Statistics (ABS) publications draw extensively on information provided freely by individuals, businesses, governments and organisations. Their continued cooperation is very much appreciated; without it the wide range of statistics published by the ABS would not be available for general use by the community. Information received by the ABS is treated in strict confidence as required by the Census and Statistics Act.

The data contained in this publication represent only a sample of the full range of statistics available from the ABS. For further information about ABS statistics and services, refer to page 26 of this publication.

DARWIN STATISTICAL DIVISION AND ENVIRONS

Darwin Statistical Division and Environs covers 10,262 square kilometres and encompasses the largely urban areas of Darwin and Palmerston (Darwin Statistical Division) and the surrounding rural areas of Litchfield, Cox-Finiss and Coomalie, extending as far south as Adelaide River township (combined as the Darwin Rural Area Statistical Subdivision).

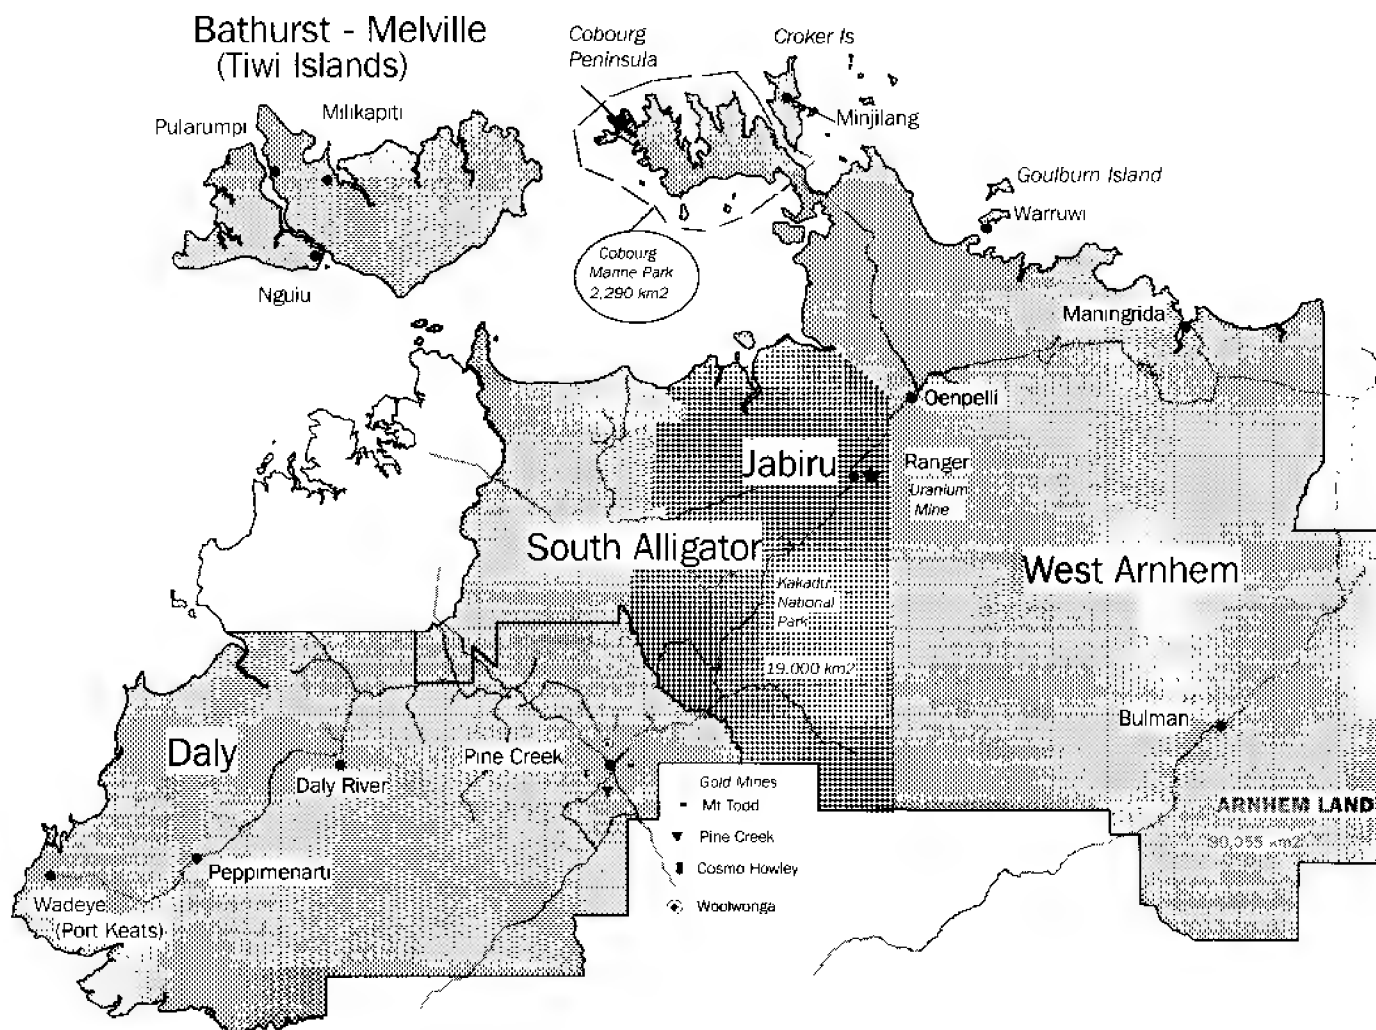

Climatic conditions are tropical with two distinct seasons. The wet season runs from October to April and the dry season from May to September. The area is influenced by monsoonal activity and is subject to cyclonic storms from tropical cyclones that form off the coast. Darwin has a yearly mean of 1659 millimetres of rain, while the average maximum temperature is 30 degrees in the 'dry' and 33 degrees (accompanied by high humidity) in the 'wet'.

The estimated resident population of the region at 30 June 1996 was 95,078 (53.5% of the Territory's total population). Strong population growth has been recorded in Palmerston and Litchfield in recent years, partly as a result of a Defence Forces build-up in the region. Approximately 9% of the region's population is of Indigenous descent.

DARWIN REGION BALANCE

The Darwin Region Balance covers an area of almost 132,012 square kilometres, partially bordered by the coastline from the Fitzmaurice River in the Joseph Bonaparte Gulf to Beaucaut Bay in the Arafura Sea (excluding Darwin Statistical Division and Environs). Mostly, the coast is low-lying, unvegetated mudflats or mangrove swamps with occasional cliffs that rarely exceed 20 metres in height. The larger rivers are tidal for more than 100 kilometres upstream from their mouths and extensively flood the coastal plains in the wet season. Climatic conditions are tropical.

The estimated resident population of the region at 30 June 1996 was 12,195 with approximately 62% of Indigenous descent. For Bathurst-Melville and West Arnhem this proportion rises to around 90%.

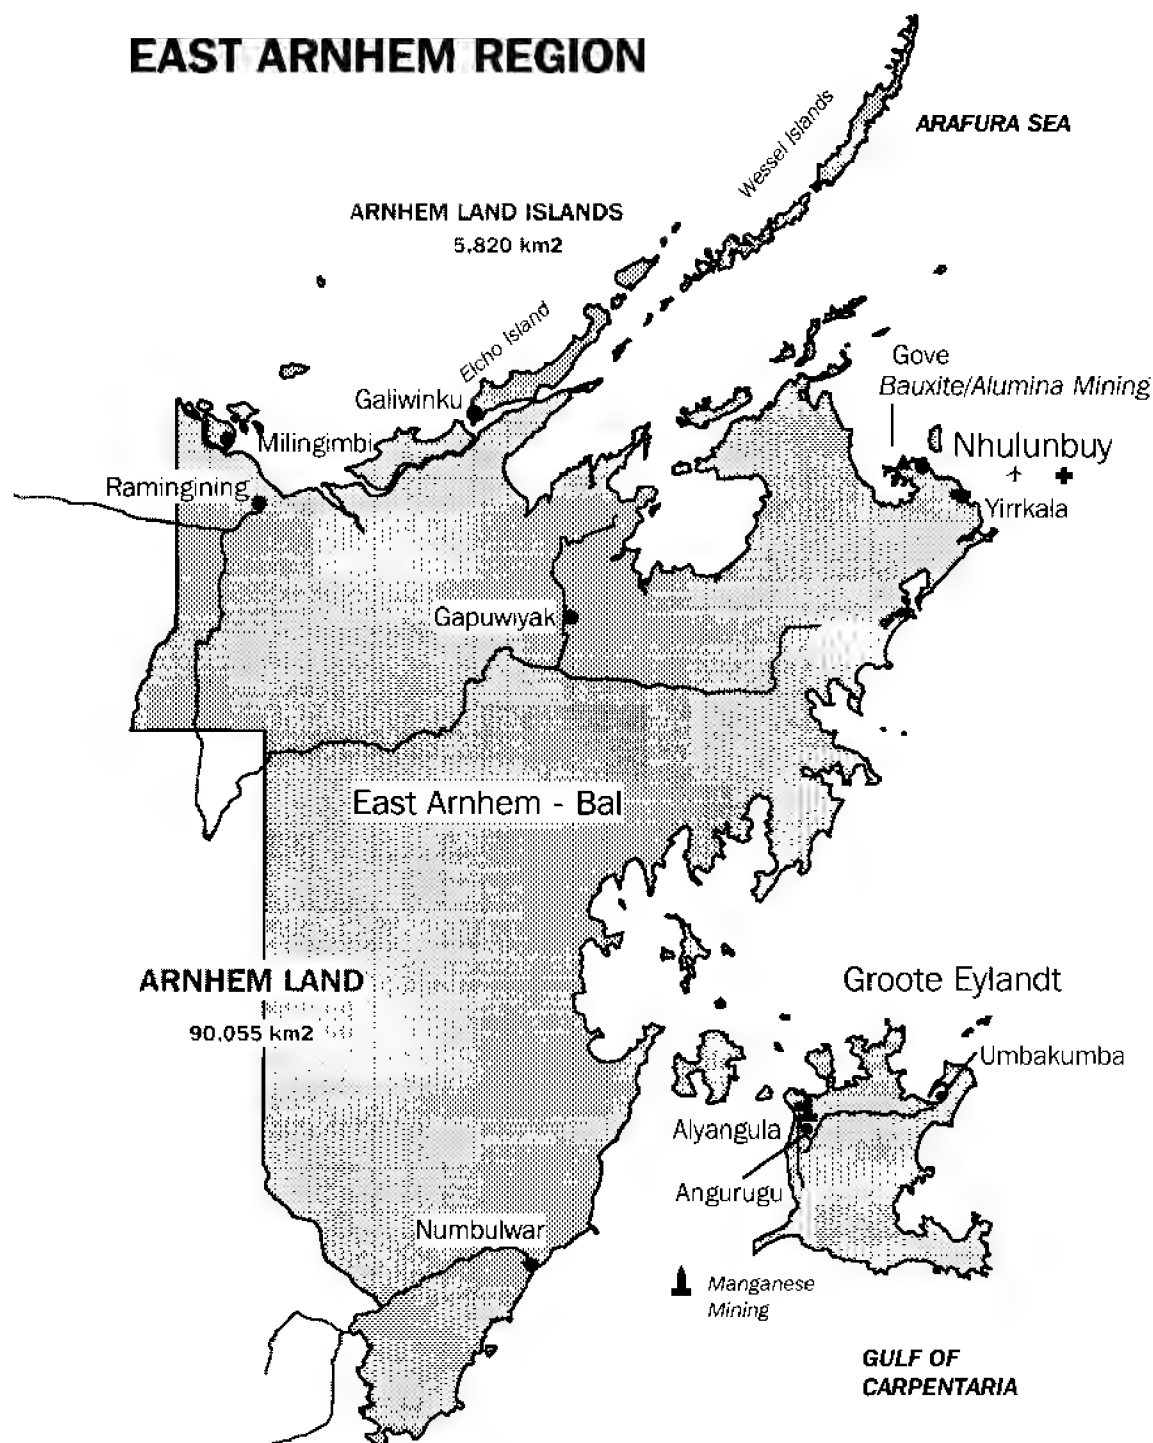

This region includes Kakadu National Park, a major tourist destination for both international and Australian visitors. Touring and recreational fishing activities are contributing to tourism in areas such as the Tiwi Islands, Cobourg Peninsula and the Daly River.

Uranium mining at Ranger (near Jabiru) and gold mining around Pine Creek add significantly to this region's economy.

EAST ARNHEM REGION

The East Arnhem Region covers an area of almost 37,997 square kilometres, bounded by the north-eastern coastline of NT. The area includes the eastern half of Arnhem Land and Groote Eylandt in the Gulf of Carpentaria. Climatic conditions are tropical. The average monthly rainfall at Gove ranges from 294 millimetres in the wet, falling mainly during December to March, to only a few millimetres in the dry.

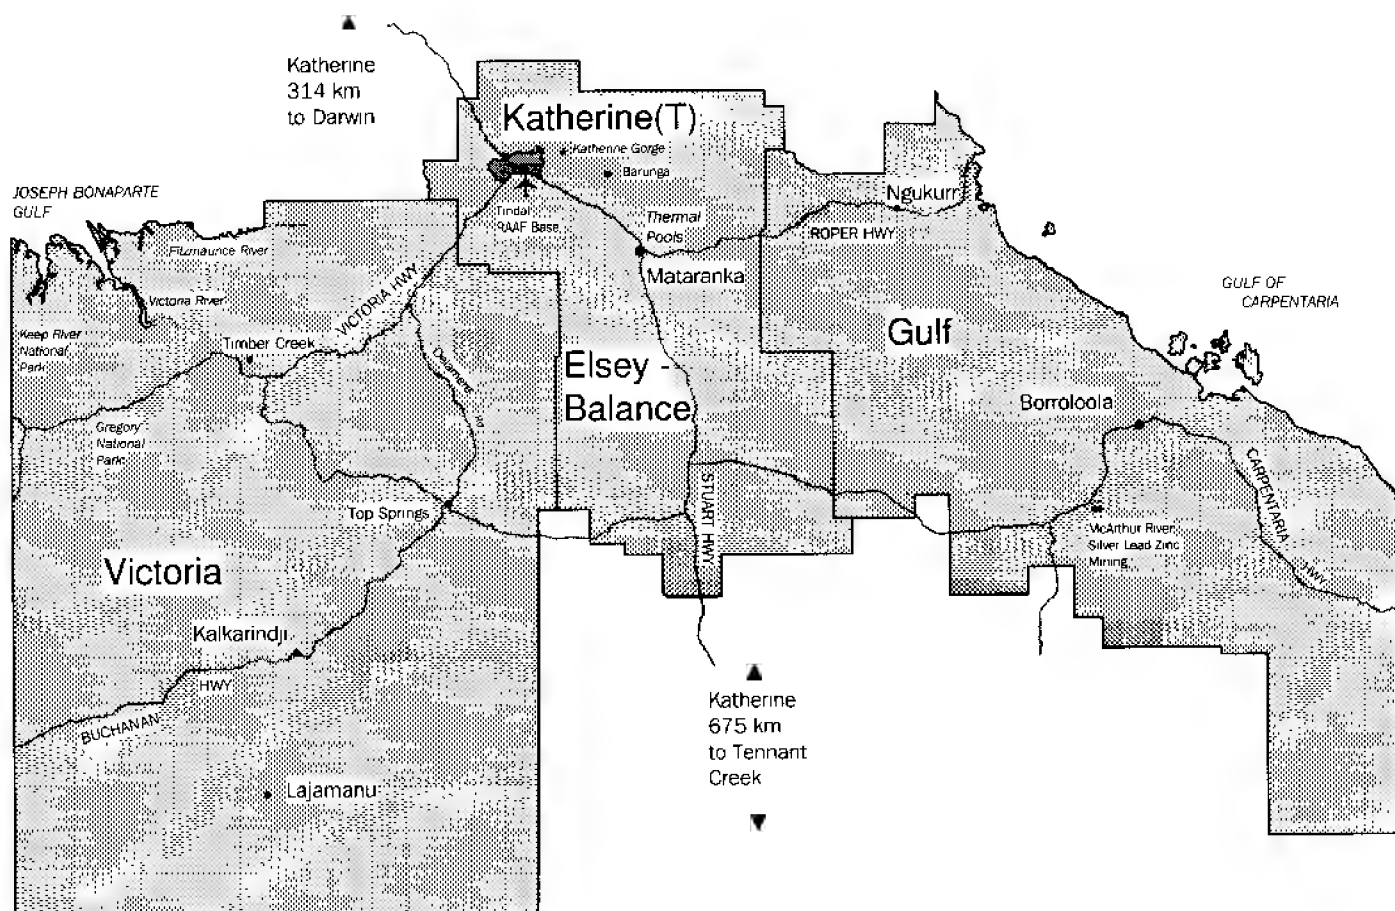

The estimated resident population of the region at 30 June 1996 was 12,565 with approximately 53% of Indigenous descent. Excluding Alyangula and Nhulunbuy this proportion rises to around 90%.

Bauxite mining at Gove and manganese mining at Alyangula provide this region with its major economic activity. Flooding during the wet isolates this area and air and sea services provide the only means of travel to other areas.

KATHERINE REGION

The Katherine Region covers an area of 336,674 square kilometres, about 25% of the Territory's land mass, and stretches from the Western Australian to the Queensland borders. Climatic conditions range from typical tropical conditions similar to the top-end of the Territory to semi-arid in the south-western parts of the region.

The estimated resident population of the region at 30 June 1996 was 15,825, just over half (56%) living in the town of Katherine. About 36% of the region's population is of Indigenous descent, ranging from 16% in Katherine (T) to 75% in the Gulf.

Situated at the junction of the Stuart and Victoria Highways, Katherine is the main service centre for extensive tourism, agricultural and mining activities in the region and is also a gateway to Darwin in the north and to Western Australia. Tindal RAAF Base, located 15 kilometres south of Katherine is Australia's northern air command centre. Katherine's population grew dramatically during the late 1980's due to the Defence Forces build-up at Tindal but the rate of growth has slowed in the 1990's.

High-grade deposits of silver, lead and zinc are the focus of the large scale McArthur River Mine, 80 km south-west of Borroloola in the Gulf.

BARKLY REGION

The Barkly Region covers an area of 283,648 square kilometres located in the central-eastern part of the Territory. Climatic conditions are semi-arid with an average annual rainfall varying between 600 millimetres in the north and 300 millimetres in the south.

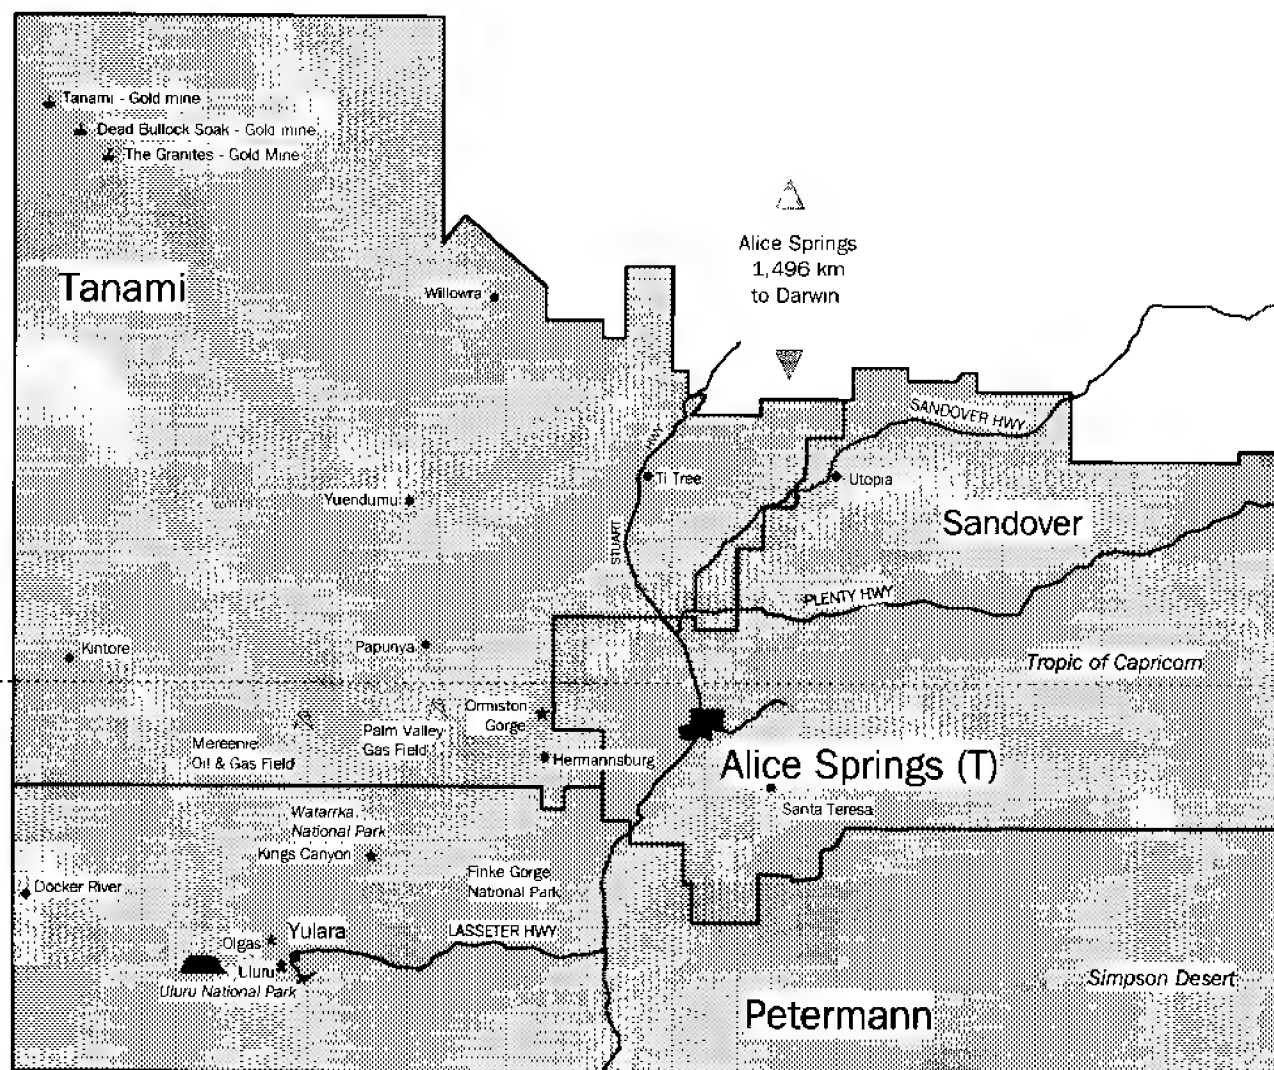

The estimated resident population of the region at 30 June 1996 was 5,993, over half residing in Tennant Creek. About 42% of the region's population is of Indigenous descent.

Tennant Creek, located near the intersection of the main north-south and eastern highways, provides infrastructure support for significant pastoral, tourism and mining activities in the region.

CENTRAL REGION

The Central Region covers an area of almost 546,572 square kilometres, 40.6% of the total Northern Territory land mass. Climatic conditions are arid with dry, cold winters (April to September) and hot, dry summers (October to March). Average annual rainfall ranges between 400 millimetres in the north to 200 millimetres in the south, falling mainly during December to March.

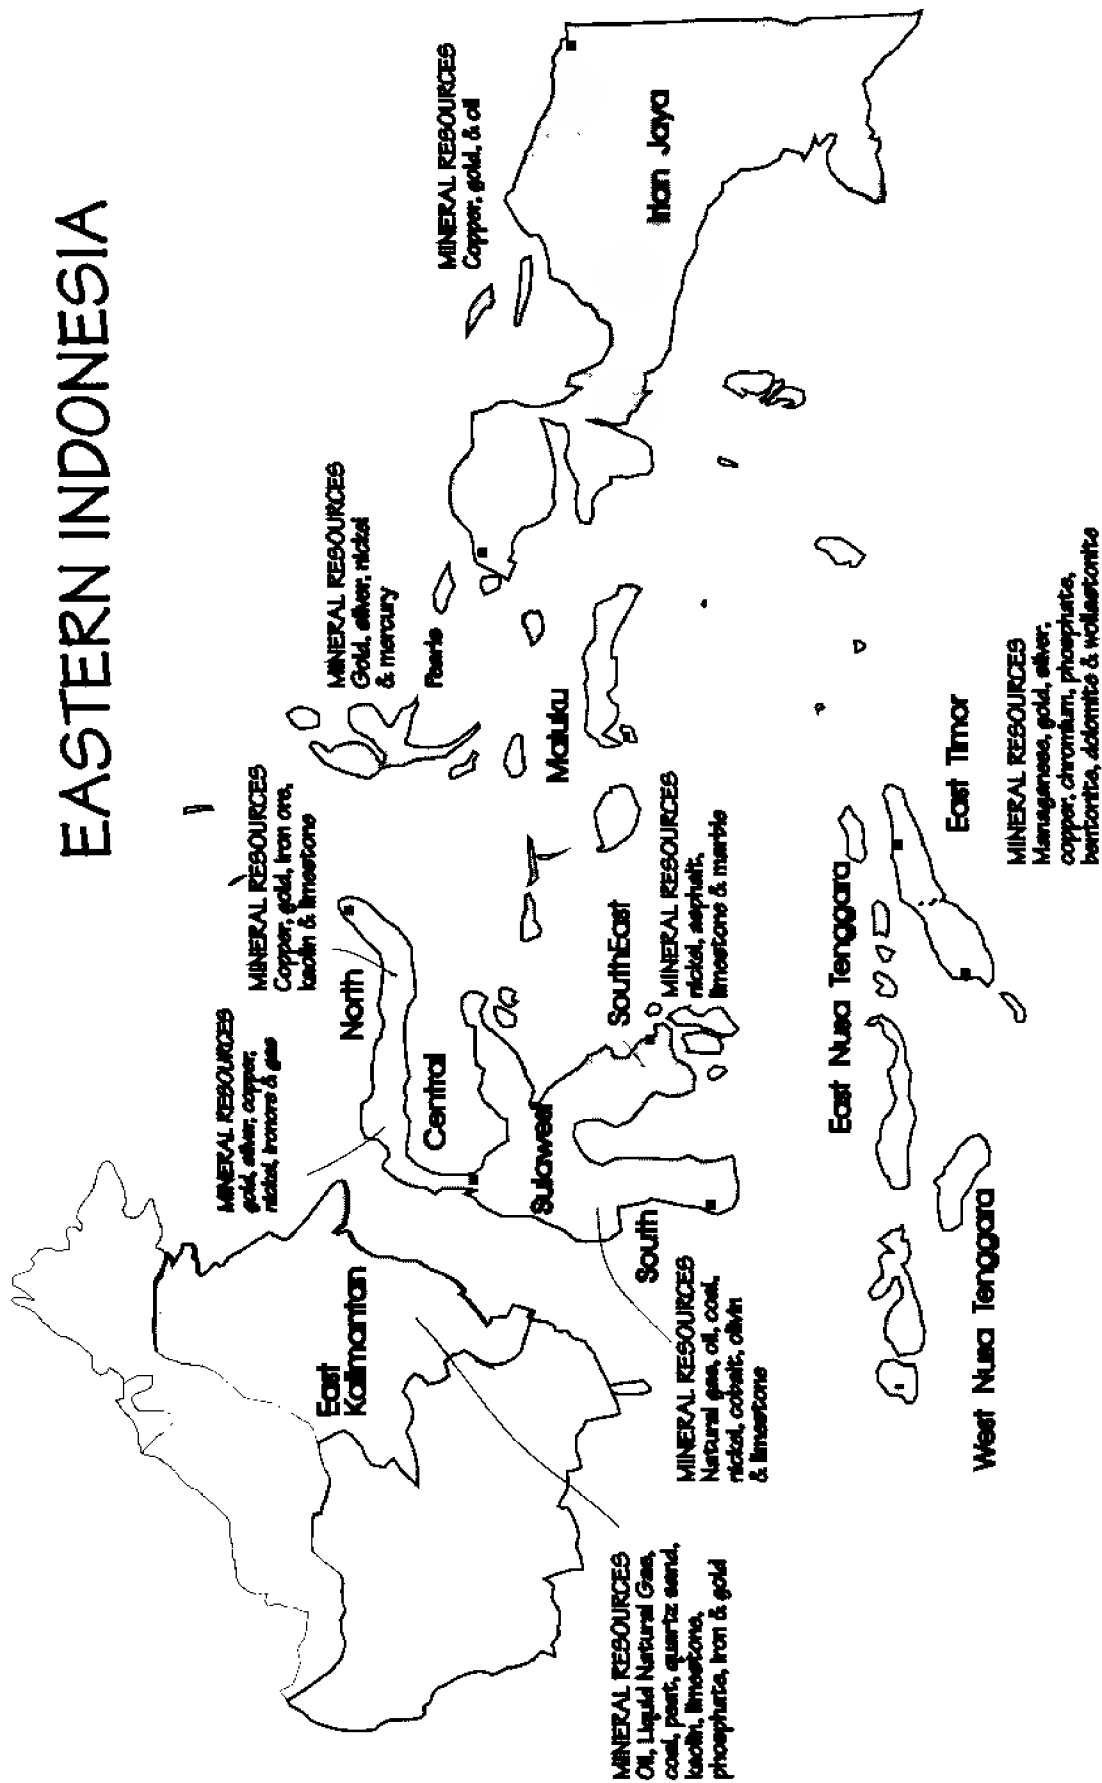

The estimated resident population of the region at 30 June 1996 was 35,891 (20.2% of the Territory's total population). Approximately 72% of the region's population live in Alice Springs and approximately 30% of the region's population is of Indigenous descent.

Alice Springs is the administrative centre for the significant tourism, pastoral, mining and defence activities in the region. Tourism infrastructure is well developed in Alice Springs, Yulara and other local destinations. There were approximately 525,000 visitors to the region in 1994-95.

EASTERN INDONESIA

9 EASTERN INDONESIA - A REGIONAL PROFILE

For the purpose of this profile, eastern Indonesia is defined as the ten eastern provinces, comprising West and East Tenggara; East Timor; Maluku; Irian Jaya; North, Central, South and Southeast Sulawesi; and East Kalimantan.

The ten provinces of eastern Indonesia account for just over 50 % of Indonesia's land mass, but only 14% of its total population.

An active seismic zone spreads over an extensive area in East Tenggara, East Timor, Maluku and Irian Jaya. Volcanic eruptions and tsunamis or tidal waves caused by earthquakes can bring about severe disasters in the region. The climate is tropical with the north-west monsoon dominating the November - March period and the south-east monsoon dominating from June to December. The provinces closest to the Northern Territory: Irian Jaya, East and West Nusa Tenggara, Maluku and East Timor are similar to Northern Australia in range of climate, topography and ecology.

Travel by air from Darwin to Kupang, in East Nusa Tenggara, is 45 minutes, compared to about 90 minutes from Darwin to Alice Springs and about 3.5 hours from Darwin to Brisbane.

Since 1991 in particular, with the signing of a Memorandum of Understanding with Indonesia, the Northern Territory Government has fostered close ties with the region's provinces to identify and promote co-operative economic developments in the region.

In 1992, the ten provinces of eastern Indonesia contributed 12.5% to Indonesia's Gross Domestic Product of 31,184.8 billion rupiahs (\$US 144.2 billion).

Agriculture is the dominant industry in most eastern Indonesian provinces, contributing an average of 36% to Gross Regional Domestic Product (GRDP) in 1992. The mining and quarrying industry dominates contribution to GRDP in East Kalimantan and Irian Jaya. Other significant industries in the region include restaurants and hotels, and public administration and defence.

The main commodities exported from the provinces in the region include coffee, tea, fish, metal ore and wood.

Major commodities imported by the provinces include machines, electrical equipment, petroleum products, iron and steel products and chemicals.

Further statistical information on Indonesia and its provinces is available from the Northern Territory Office of the ABS. See page 25 for contact details.

(a) Reference year for West Nusa Tenggara & Southeast Sulawesi is 1992 (b) Hotels that fulfil the requirements as set by the Directorate General of Tourism for Starred Hotels. (c) The figure for Irian Jaya includes US\$25.1m unidentified imports for the Maluku & Irian Jaya Region. Unidentified imports for Sulawesi are shown in the total for Eastern Provinces and amount to US\$6.9m. The import figure for East Kalimantan only includes imports from the ports of Balikpapan, Samarinda and Lingkas Tarakan. (d) The figure for Irian Jaya includes US\$80.4m of unidentified exports for the Maluku & Irian Jaya Region. Unidentified exports for Sulawesi are shown in the total for Eastern Provinces and amount to US\$124.4m. The export figure for East Kalimantan only includes exports from the ports of Balikpapan, Samarinda, Lingkas Tarakan, Bontang and Senipah.

REGIONS

STATISTICAL LOCAL AREAS

Statistical Local Areas (SLAs) consist of one or more whole Census collection districts (CDs) and cover in aggregate, the whole area of Australia without gaps or overlaps. Prior to July 1996 the Northern Territory had 59 SLAs consisting of 311 CDs.

STATISTICAL SUBDIVISION

Statistical Subdivisions (SSDs) consist of one or more Statistical Local Areas. There are 11 SSDs in the Northern Territory.

STATISTICAL DIVISION

Statistical Divisions (SDs) consist of one or more Statistical Subdivisions. In the Northern Territory, SDs are based on Territory Government Administration Regions. The Northern Territory has 3 such SDs: Darwin SD; Northern Territory- Balance SD and Off-Shore Areas & Migratory SD

LOCAL GOVERNMENT AREA

Legal Local Government Areas (LGAs) are spatial units which represent the whole undivided geographical area of responsibility of either:

- an incorporated local government council, or
- an incorporated Community Government Council (CGC) where the CGC is of sufficient size and statistical significance. Coomalie CGC area meets this criteria.

The major part of the Northern Territory is unincorporated. At the time of the 1991 Census the incorporated part included the areas covered by the legal LGAs of Darwin, Alice Springs, Jabiru, Tennant Creek, Katherine, Palmerston, Litchfield and the CGC of Coomalie.

DARWIN STATISTICAL DIVISION AND ENVIRONS

Darwin Statistical Division and Environs is comprised of Darwin City, Palmerston and Darwin Rural Statistical Subdivisions.

DARWIN RURAL

Darwin Rural refers to the Darwin Rural Statistical Subdivision which contains the SLAs of Litchfield (S) -Part A, Litchfield (S) -Part B, Cox - Finnis and Coomalie.

DARWIN REGION BALANCE

Darwin Region Balance contains the SLAs of Bathurst-Melville, Jabiru (T), South Alligator, West Arnhem and Daly.

PALMERSTON (T)

Palmerston (T) is a Local Government Area which contains the SLAs of Driver, Gray, Moulden, Woodroffe and Palmerston (T) - Balance.

PALMERSTON SSD

Palmerston Statistical Subdivision contains the SLAs of East Arm, Driver, Gray, Moulden, Woodroffe and Palmerston (T) - Balance.

LITCHFIELD SHIRE

Litchfield Shire contains the SLAs of Litchfield (S) - Part A and Litchfield (S) - Part B.

EXPLANATORY NOTES

DEFINITION OF TERMS USED

BIRTHS & DEATHS

Births and deaths relate to all registrations of such events which occurred within Australia, irrespective of State of registration, where the usual residence was within Northern Territory. Births are allocated to a statistical local area of the State according to the usual residence of the mother, and deaths are allocated according to the usual residence of the deceased (infant deaths are generally assigned to the usual residence of the mother).

BUILDING STATISTICS

Statistics of building work approved are compiled from:

- permits issued by private certifiers in areas subject to building control by the NT Department of Lands, Planning and Environment.
- contracts let or day labour work authorised by Commonwealth, State, and semi-government and local government authorities;
- all approved new residential building jobs valued at \$10,000 or more;
- approved alterations and additions to residential building valued at \$10,000 or more; and
- all approved non-residential building jobs valued at \$50,000 or more.

BUSINESS LOCATIONS

This information has been extracted from a June 1996 snapshot of businesses on the *ABS Business Register*. The prime purpose of the Register is to provide a comprehensive source of business names and addresses from which selections can be made for inclusion in ABS economic censuses and surveys. The businesses on the Register are classified according to their industry and employment size. It is therefore possible to use the Register to derive statistical information.

The term business is used in a wide sense to include companies, sole proprietorship's, professional services, community services, government agencies and departments, religious bodies, etc. However, the ABS Business Register only includes those businesses that employ wage and salary earners and so businesses operated entirely by sole proprietors, partners and unpaid family members are excluded from this data.

In the case of businesses involved in agriculture, however, the ABS Business Register includes all those that have agricultural operations with an estimated value in excess of \$5,000 regardless of whether they employ wage and salary earners.

The information most readily available from the ABS Business Register is counts of business units (either management units or locations) classified by industry, geographic area and employment size, although counts can be classified by other data items as well.

CATTLE PRODUCING ESTABLISHMENTS

These figures come from the annual Agricultural Census, year ending 31 March 1995. Cattle producing establishments are those whose predominant activity is cattle production.

CATTLE NUMBERS

Cattle numbers are the counts of cattle, both for breeding and meat production, held by agricultural establishments on 31 March 1995.

**COMMUNITY
DEVELOPMENT
EMPLOYMENT PROJECTS**

The CDEP program, administered by the Aboriginal and Torres Strait Islander Commission, provides much of the Indigenous employment in the Northern Territory. Under the program, Aboriginal and Torres Strait Islander people voluntarily forego their individual entitlement to unemployment benefits and partake in community development initiatives in return for wages equivalent to their foregone benefit entitlement. The figures used in this publication were provided by ATSIC.

DWELLING UNIT

A dwelling unit is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for long-term residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units.

**HORTICULTURAL
ESTABLISHMENTS**

Agricultural establishments whose main activity is fruit growing (orchard, vine, berry, and tropical fruits); nuts; herbs and vegetables.

HOUSEHOLD INCOME

Household income is the sum of the personal incomes of each resident present in the household.

**INDIGENOUS
COMMUNITIES**

These numbers were obtained from the 1992 *ATSIC Housing and Community Infrastructure Needs Survey*. The survey was a major initiative of ATSIC and collected information across Australia on Aboriginal and Torres Strait Islander communities, outstations/homelands and town camps. Information was also collected about the housing needs and some of the services available to people who live in country towns. Final results have been compiled separately for ATSIC Regions; State and Territories; and total Australia. A detailed survey report is also available for each of the Aboriginal and Torres Strait Islander discrete communities that were surveyed.

For further information about this survey contact the National Centre for Aboriginal and Torres Strait Islander Statistics in the Darwin Office of ABS.
Phone (08) 8934 2192; Fax (08) 8941 0715

**LABOUR MARKET -
DEETYA ESTIMATES**

The information on unemployment rates contained in this publication was produced by the Department of Employment, Education, Training and Youth Affairs (DEETYA) and published in *Small Area Labour Markets - Australia*.

The ABS does not publish unemployment data from the monthly labour force surveys for small areas because of high sampling errors at this level of disaggregation. DEETYA has implemented a procedure for deriving small area unemployment estimates, based on the Structure Preserving Estimation (SPREE) methodology. This procedure involves the following steps:

- (a) The DSS data at postcode level are used to derive the number of beneficiaries in each LGA/SLA using postcode conversion weights.
- (b) As the number of beneficiaries is generally lower than the number of unemployed persons, the SPREE procedure adjusts the unemployment beneficiaries numbers in each LGA/SLA to ensure that the total Labour Force (Dissemination Region) level (by sex, marital status and age) is the same as from the monthly labour force surveys.

Care should be exercised in the interpretation of these figures, especially those SLAs which have less than 2,000 persons in the labour force.

MEDIAN INCOME	Median income is the dollar amount which divides the income distribution of a population into two equal groups; one half of the households has income above the median and the other half has income below it.
OCCUPIED PRIVATE DWELLINGS	Private dwellings include all houses, flats, units, apartments, caravans and other improvised types of dwellings. Occupied caravans in parks are counted as occupied private dwellings. Non-private dwellings include motels, prisons, welfare institutions, hospitals, retirement villages, boarding schools etc.
POPULATION	The estimates for 30 June 1995 and 30 June 1996 are based on the counts of the Census of Population and Housing held on 6 August 1991, adjusted for under-enumeration, as measured by a post-enumeration survey, plus the estimated number of residents temporarily overseas and subsequently the numbers of births, deaths and estimates of interstate and overseas migration. Estimates for 30 June 1996 are preliminary.
RETAILING	<p>This data was derived from the 1991-92 <i>Retail and Services Census</i>. The scope of the Census included all shopfront locations operating at 30 June 1992 and classified to Division G (Retail Trade) of the 1993 edition of the Australian and New Zealand Standard Industrial Classification (ANZSIC Catalogue 1292.0). Also, a range of services classified to other Divisions of ANZSIC, which predominantly operate from shopfront locations, were included because of their association with retailing activity. These outlets have been grouped under the headings 'Selected Personal Services' and include: ANZSIC Class 5730 - Cafes and Restaurants; 8632 - Optometry and Optical Dispensing; 9511 - Video Hire Outlets; 9521 - Laundries and Dry-Cleaners; 9522 - Photographic Film Processing; 9526 - Hairdressing and Beauty Salons.</p> <p>Within certain types of retail and services activity, non-shopfront locations (classified to in-scope ANZSIC Classes) were excluded from the scope of the census. Examples of these types of locations include industrial canteens, central photo processors and commercial laundries. (For more detailed explanation see the explanatory notes in the publication <i>Retailing in the Northern Territory 1991-92</i> - Catalogue No 8623.7).</p>
ROOM OCCUPANCY RATE	Refers to the proportion of room nights occupied to the number of guest rooms available during the year ended 30 June 1996, expressed as a percentage.
STANDARDISED DEATH RATE	The indirect method (expressed per 1,000 persons) was used to calculate the standardised death rates. These are calculated by initially applying a standard set of age-specific rates (those for persons in the 1991 Australian population) to the population under study, and comparing the actual number of deaths with the number expected assuming that these standard death rates applied. The standardised death rate for the population under study is then calculated by multiplying the crude death rate of the standard population by the ratio of actual deaths to expected deaths. The indirect method is used in the calculation of standardised death rates for data at Statistical Local Area level.
TAKINGS FROM ACCOMMODATION	Refers to revenue received from the provision of both short-term and long-term accommodation at the accommodation establishment. Takings from meals are excluded.

**TOURIST ACCOMMODATION
ESTABLISHMENTS**

Hotels, motels, & guest houses with facilities are defined as establishments which provide predominantly short-term accommodation (i.e. for periods of less than two months) available to the general public. The tourist accommodation establishments for which statistics are included in this publication are licensed hotels, motels, and guest houses which provide bath or shower and toilet in most guest rooms and have breakfast available for guests.

**URBAN AREA
(Indonesia)**

An Urban Area is defined as having the socio-economic characteristics of the smallest unit of an administrative area. This area is defined as urban if it satisfies certain criteria in terms of population density, percentage of agricultural households, urban facilities (road, formal educational facilities, public health service, etc). Reference: *Biro Pusat Statistik (Central Bureau of Statistics, Indonesia) - Welfare Indicators 1994*

RELATED PUBLICATIONS RELEASED BY THE DARWIN OFFICE

Cat. No.	Publication
1306.7	Northern Territory in Focus Provides an overview of the NT in the form of text, tables, maps, graphs and photos. Includes separate chapters on a wide range of economic and social topics.
3207.7	Estimated Resident Population By Age, Sex and Statistical Local Area, Northern Territory (annual) Contains the estimated resident population by age (in age groupings) for each statistical local area, statistical subdivision and statistical division at 30 June.
3311.7	Demography, Northern Territory , (annual) Contains tables on births, deaths, infant deaths, marriages and divorces. Detailed population statistics including overseas arrivals and departures and other components of population change and some data for statistical local areas are also included.
3316.7	Northern Territory Indigenous Demography Contains tables on births and deaths, experimental population projections and age structures.
7113.7	Agriculture and Fishing, Northern Territory , (annual) Contains various agricultural and fishing statistics such as: Value of agricultural and fishing production; area of holding, number of cattle on holding and disposals by statistical local area; livestock and meat exports; and selected fishing industry landings.
8635.7	Tourist Accommodation, Northern Territory (quarterly) Establishments with facilities providing short-term accommodation (ie less than two months); hotels, motels and guest houses, caravans parks, holiday flats and units and visitor hostels showing number of establishments, capacity, occupancy rates, employment and takings from accommodation for each month, by type of establishment. Also includes some regional data.
8731.7	Building Approvals, Northern Territory (monthly) Number of dwelling units and value of residential buildings approved for private sector and public sector; value of alterations and additions to residential buildings and value of non-residential building by class of building approved. Data for the larger population centres are also included.
8752.7	Building Activity, Northern Territory (quarterly) Number of dwelling units and value of residential buildings, value of non-residential building by class of building (eg hotels, offices, etc) for private sector and public sector by stage of construction. Unpublished data for small areas is available on request from Information Services, Darwin Office (08 8943 2111), in the form of quarterly and annual tables.

ABS publications are available for reference at most university and TAFE libraries, the State Reference Library in Darwin and the public libraries throughout the Northern Territory.

INFORMATION AND CONSULTANCY SERVICES

The Client Services Branch in the Darwin Office provides information and advice on a wide range of statistical needs. The consultancy service operates on a fee for service basis. Information tailored to the special needs of clients can be obtained in a number of forms such as on floppy disk or specially produced reports.

Inquiries may be made by telephoning Client Services on (08) 8943 2111, by facsimile on (08) 8981 1218 or writing to Client Services, ABS, GPO Box 3796, Darwin 0801, or by a personal visit to 5th floor, AANT House, 81 Smith St, Darwin.

The National Centre for Aboriginal and Torres Strait Islander Statistics is located in the Darwin Office and is responsible for production and release of statistics about the Aboriginal and Torres Strait Islander population. Data on a range of subjects relating to Australia's Indigenous people is available from a variety of sources and staff in the unit are pleased to advise on availability.
Phone (08) 8943 2194 or fax (08) 8941 0715.

ABS PRODUCTS AND SERVICES

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.
